

Directions For Calibrating Your Hygrometer

Wrap the hygrometer in a wet cloth for 30 - 40 minutes. Remove the hygrometer from the wet cloth and readjust the hygrometer as follows:

- 

1. Insert the screwdriver into the back edge of the hygrometer. Slowly push down on the screwdriver to pop the backing off.
- 

2. Place your thumb on the white paper inside the hygrometer so it does not move. Then with your fingers gently turn the outer ring and turn the needle so it points to 100.
3. Snap the backing back onto the hygrometer.

**Thank you for purchasing your
hygrometer from Don Salvatore!**
